Keara,

I apologize for the delay, everything looks good and the statement regarding Dimock it fine as it is. I think it's finally a go.

Thanks.
Jeannine

Yep... I'm still working on it.

We edited it to reflect comments from all OW offices and OECA and we want to make sure you're OK with this version and we'll get it out. Finally.

The one specific question we would like your input on is the statement related to Dimock and whether you are OK with that or need edits.

Thank you! (And I continue to apologize for the delay... I'm almost out of my CMS hole on hydraulic fracturing and hopefully will not have so many problems in the future.)
